Meeting 01 — Supervisor Meeting

Date: 2 October 2026
Time: 11.30AM
Location/Platform: Block B Ground floor
Attendees: WF, Chen Yi, Kamila, Chris
Absent: Yoon Jae
Supervisor: Dr Regina

1. Purpose of Meeting

Initial discussion with supervisor to clarify the DigiTales AI project brief, expected scope and near-future plans.

2. Discussion / Key Points

Project scope

- The program is meant to teach about digital citizenship
- Users can input their own narratives and AI will then categorize them based on emotions and output unique storytelling.

NLP

- NLP (Natural Language Processing) is a must have for this project as there already exists similar things. NLP is what will differentiate our project from the pre-existing ones and we are recommended to write this in our report later on as well.

Target users

- Foundation students.

Technical considerations

- What AI we want to use, whether API or what (Though this is for very later on)
- (If not all) Which 9 of the Digital Citizenship characteristics do we want to implement in the project later

  *Note that Dr Regina seems to be very open to ideas and is not really restricting what we should use or how we should approach the project.

3. Decisions Made

Decision	Reason
Made a MS Teams Group Chat with all members	Suggested by Dr Regina for easier communication
Dr Regina will be the one to decide on when we meet with the client	Dr Regina can tell us when we are ready to proceed to the next stage and also because she will brief us and how to prepare before meeting the client

4. Requirements / Expectations Identified

Things that Dr Regina said the system should eventually have.

- NLP
- AI to classify input narratives into different emotions and unique storytelling for each emotion

5. Next Meeting

Date: 2 weeks from now (tentatively)
Purpose: Decide how we would like to proceed with the assignment
Things to prepare:

- Read up on digital citizenship (She will provide notes but feel free to explore other resources)
- Read up on NLP
- Brainstorm how we want to proceed

6. General Notes:

- So far since we are all very unsure about what the project is really about, Dr Regina's plan is for us to just study up first and then plan the next meeting with her. (See what to study up on here)
- Meetings with the client will be planned by Dr Regina. She will help us with what we should ask the client but will not be present herself during the meeting itself
- We can decide to meet with Dr Regina before 2 weeks if we feel we are ready before then.
